Consultant Gynaecologist and Urogynaecologist. Established and runs a specialist NHS menopause clinic. Past Chairman of the British Menopause Society, current board member of the International Menopause Society and associate editor of Climacteric.
IN THIS WEBINAR

An update on MHT prescribing principles and options
1. Global Consensus Statement on use of MHT
2. Benefits of MHT
3. Adverse effects of MHT
4. How to prescribe MHT

The do’s and don’ts of prescribing
1. Consider the estrogen and progestogen parts of HT as 2 separate and variable components
2. Consider changing the type of progestogen if experiencing side-effects
3. Consider changing dose and/or route of estrogen if symptom control not achieved
4. Don’t start no bleed combinations too early or there maybe irregular bleeding
5. Don’t forget vaginal estrogens can be used in conjunction with systemic treatment if there are persistent VVA symptoms.
